Appendix. Elections and Countries included in PEI-4.5 43

Overview and core concepts

This codebook describes a global expert survey on Perceptions of Electoral Integrity (PEI). This study is conducted by Pippa Norris, Ferran Martínez i Coma, Alessandro Nai and Max Grömping for the Electoral Integrity Project based at the Universities of Sydney and Harvard.

The PEI asks experts to evaluate electoral integrity. This codebook describes all variables included in the dataset.

Conceptual framework

The concept of '*electoral integrity*' refers to international standards and global norms governing the appropriate conduct of elections.

These standards have been endorsed in a series of authoritative conventions, treaties, protocols, and guidelines by agencies of the international community, notably by the decisions of the UN General Assembly, by regional bodies such as the Organization for Security and Cooperation in Europe (OSCE), the Organization of American States (OAS), and the African Union (AU), and by member states in the United Nations. Following endorsement, these standards apply universally to all countries throughout the electoral cycle, including during the pre-electoral period, the campaign, on polling day, and in its aftermath.

Measurement

To operationalize this notion, the PEI asks experts to evaluate elections using 49 indicators, grouped into eleven categories reflecting the whole electoral cycle. The dataset also includes a summary 100-point PEI Index based on summing all 49 indicators. The PEI index provides one way to summarize the overall integrity of the election. Alternatively, analysts can examine indices for each of the eleven dimensions, or use the disaggregated scores for each of the 49 individual indicators. In this way, data can be re-aggregated flexibly to construct any measure which is preferred conceptually. The PEI dataset is designed to provide a comprehensive, systematic and reliable way to monitor the quality of elections worldwide.

There are many ways to define an election expert. An *expert* is defined in this survey as a political scientist (or social scientist in a related discipline such as law, sociology, economics, anthropology, mathematics, or statistics) who has published on (or who has other demonstrated knowledge of) the electoral process in a particular country. Specifically, demonstrated knowledge is defined by the following criteria: (1) membership of a relevant research group, professional network, or organized section of such a group; (2) existing publications on electoral or other country-specific topics in books, academic journals, or conference papers; and (3) employment at a university or college as a teacher. At least forty experts per country were contacted for each election, including both domestic and international experts. The domestic/international distinction was made based on institutional affiliation, citizenship, and country of residence.

Data release

Data are available at: <http://thedata.harvard.edu/dvn/dv/PEI>. This Dataverse facility allows users to generate analysis using the online data, to download in Stata, SPSS and tab-delimited formats, and to find further technical details about the research design, codebook and questionnaire.

The pilot study (PEI_1), first released in May 2013, covered 20 elections held from 1 July 2012 to 31 December 2012. The second release (PEI_2) was made publically available in February 2014 and included all national elections held from 1 January to 31 December 2013. The midyear release (PEI_2.5) in August included all these earlier cases and expanded the comparison by adding elections occurring from 1 January 2014 to June 30, 2014.¹ The third release of the dataset (PEI_3) included 2012 and 2013 cases and expands the comparison by including all national elections held from January 1st to December 31st 2014. In total PEI_3 included expert evaluations of 127 elections held in 107 countries.² PEI_3.5 included the responses for 1696 experts for 153 elections in 125 countries.³ PEI_4.0 gathered the opinion of 2080 experts for 180 elections in 139 countries.

PEI_4.5 compiles the responses of 2417 experts for 213 elections in 153 countries for the first half of 2016.

Three files are released in PEI_4.5:

1. An expert-level file (with individual-level results for 2417 experts); [Marked 'X' in the codebook]
2. An election-level file (with results aggregated for each of the 213 separate contests); [Marked 'E' in the codebook]
3. A country-level file (with results aggregated for each of the 153 countries, useful for merging with cross-national data). If you have other data to merge, you can do so with the Correlates of War (COW) ccode variables, as well as Pippa Norris' country classification. [Marked 'C' in the codebook]

In this codebook we present all the variables, how they were constructed and labeled. Since many variables appear in all three datasets, we differentiate between them in the last three columns. If there is an X, the variable is included at the expert level; if there is an E, the variable is included at the election level; and when there is a C, the variable is included at the country level.

Variables

<i>examplevariable</i>	Variable label	X	E	C
	<i>Variable description</i>			
	SECTION I. ELECTION DATA			
expert	Expert reference number	X		
	An anonymized expert reference number.			
election	Election code	X	E	
	An election is defined as a nation-wide contest either for the executive or the legislature where electors vote directly for the person (or party) on the ballot, excluding appointment indirectly by a committee or institutions such as the legislature.			
	For countries with multiple election rounds, responses were collected on the second round. When elections were concurrent for the legislative and the executive (eg. in the United States), then only the higher-level executive office was included.			
	The table in the appendix provides basic information about the elections included in the study.			
	This string variable is composed of the standard three-letter ISO abbreviation for the name of the country, followed by the date of the election (DD-MM-YYYY), the type of election (Presidential, P, or Legislative, L), and the round (1 or 2).			
	Examples: Second round of Presidential elections in Cyprus on 24 February 2013: "CYP_24022013_P2" Pakistani Legislative elections on 11 May 2013: "PAK_11052013_L1"			
country	Country name	X	E	C
	This string variable is the name of the countries included in the study. The survey includes all independent nation-states with more than 100,000 inhabitants that held elections from 1 July 2012 to 1 July 2016. An independent nation-state is defined by membership of the UN General Assembly. Thus, dependent territories like Palestine are excluded. ⁴			
	<p>The map displays the global distribution of countries included in the study between 2012 and 2016. Countries covered are shown in solid black, including the United States, Canada, Mexico, most of Europe, and several countries in Africa and Asia. Countries not yet covered are shown in white. Areas with no national elections (de jure) are indicated by diagonal hatching, and areas with no national elections (de facto) are indicated by cross-hatching.</p>			
	Examples: "Cameroon", "Germany", "Kuwait", "Philippines"			
ccode	COW country code	X	E	C
	Numeric country code from the Correlates of War.			

	Source: State System Membership List, v2011. Available from: http://www.correlatesofwar.org (accessed February 6, 2015). Examples: 255 Germany, 349 Slovenia, 432 Mali, 712 Mongolia.			
ISO	ISO 3 digit	X	E	C
	Three letter country codes published by the International Organization for Standardization (ISO). Examples: Bhutan, BTN; Romania, ROU; Sao Tome and Principe, STP			
Refno	Country reference number	X	E	C
	Numeric country code from Pippa Norris's cross-national dataset on democracy. Source: Democracy Cross-national Data, Release 3.0 Spring 2009 http://www.pippanorris.com/ Examples: 30 Cameroon, 64 Germany, 91 Kuwait, 134 Paraguay.			
year	Election year	X	E	
	Year of the election.			
office	Elected office	X	E	C
	What government body was this election for? Expert-level: Presidential,1; legislative, 0. Election level: Presidential, 1; otherwise, 0. Country level: Legislative, 0; Presidential,1; both, 2. Examples: The Venezuelan presidential election on 14 April 2013, has a value of 1. The Ukrainian legislative election on 28 October 2012, has a value of 0.			
numresponses	Number of PEI expert responses		E	C
	The number of responses for either a particular election or country.			
contacted	PEI experts contacted		E	C
	The number of experts contacted for either a particular election or country.			
responserate	PEI response rate		E	C
	The overall response rate calculated by taking the number of responses by election divided by the number of experts contacted per election. This variable ranges from 0.05 to .71. Examples: Panama, 0.2; Sweden, 0.52			
surveynum	# of times country surveyed			C
	The number of times that any particular country has been surveyed. Examples: Germany, once; Georgia, twice; Japan, three times.			
y2012	Survey year 2012			C
	Dummy variable. It has two values: 1 if the country was included in the survey of 2012 and 0 otherwise. Examples: 1, Sierra Leone; 0, Spain			
y2013	Survey year 2013			C
	Dummy variable. It has two values: 1 if the country was included in the survey of 2013			

	and 0 otherwise. Examples: 1, Australia; 0, Namibia			
y2014	Survey year 2014			C
	Dummy variable. It has two values: 1 if the country was included in the survey of 2014 and 0 otherwise. Examples: 1, New Zealand; 0, Netherlands			
y2015	Survey year 2015			C
	Dummy variable. It has two values: 1 if the country was included in the survey of 2015 and 0 otherwise. Examples: 1, Denmark; 0, India			
y2016	Survey year 2016			C
	Dummy variable. It has two values: 1 if the country was included in the survey of 2016 and 0 otherwise. Examples: 1, Central African Republic; 0, Chile			
COUNTRYDATA	SECTION II. COUNTRY DATA	X	E	C
PR	Freedom House Political Rights Scale (1-7)	X	E	C
	This scale covers the electoral process, political pluralism, participation and the functioning of government. Political rights are defined as those which enable people to participate freely in the political process. The year is matched to the date of the election. Countries are graded between 1 (most free) and 7 (least free). Therefore, the 2014 Freedom House report was used for 2013 elections. More detail are available at: www.freedomhouse.org Examples: Republic of Congo, 6; Venezuela, 5; Romania, 2.			
CL	Freedom House Civil Liberties Scale (1-7)	X	E	C
	The questions for the creation of the scale cover the freedom of expression and belief, associational and organizational rights, the rule of law and personal autonomy and individual rights. The year is matched to the date of the election. Countries are graded between 1 (most free) and 7 (least free). Therefore, the 2014 Freedom House report was used for 2013 elections. More details can be found at: www.freedomhouse.org Examples: Republic of Congo, 5; Venezuela, 5; Romania, 2.			
fhcategory	Freedom House category (Free, Partially Free, Not Free)	X	E	C
	A variable coding the combined average ratings for Political Rights and Civil Liberties. Countries whose ratings average is from 1.0 to 2.5 are considered "Free", 3.0 to 5.0 "Partly Free", and 5.5 to 7.0 "Not Free". In PEI 0, is not free; 1, partially free; 2, free. Examples: Republic of Congo, not free; Venezuela, partially free; Romania, free.			
polity	Polity combined score (-10->+10)	X	E	C
	The Polity scheme consists of six component measures that record key qualities of			

	<p>executive recruitment, constraints on executive authority, and political competition. It also records changes in the institutionalized qualities of governing authority. The elections held in 2013 have the values from 2012 because 2013 scores were not available at time of research. "Polity Score" captures regime authority spectrum. The scores can be converted to regime categories. More details are available at: http://www.systemicpeace.org/polity/polity4.htm</p> <p>Examples: Angola, -2; Lithuania, 10; Mali, -77.</p>			
polity2	Polity combined score with mean substitution for missing codes	X	E	C
	<p>Polity combined score with zero substitution for missing codes as recommended by the Polity project. The elections of 2013 have the values of 2012.</p> <p>Examples: Angola, -2; Lithuania, 10; Mali, 0.</p>			
durable	Number of years since the last regime transition	X	E	C
	<p>The number of years since the last regime transition that led to a three point change or greater from previous year.</p> <p>Examples: Japan, 60 (end of the occupation); Equatorial Guinea, 43 (independence from Spain in 1968).</p>			
gdp_pc_ppp	GDP per capita on purchasing power parity 2011	X	E	C
	<p>GDP per capita based on purchasing power parity (PPP). PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States. GDP at purchaser's prices is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current international dollars based on the 2011 ICP round. Source: World Development Indicators.</p> <p>Examples: Guinea-Bissau, 1163.55\$; Colombia, 11687.2\$; Austria, 42887.7\$.</p>			
development	World Bank income category (1-4)	X	E	C
	<p>The level of economic development according to the World Bank. It has four categories: low ,1; lower-middle, 2; upper-middle, 3; high, 4.</p> <p>Source: www.worldbank.org</p> <p>Examples: Cambodia, low income; Philippines, lower-middle income; Jordan, upper-middle income, Australia, high.</p>			
region	Geographic region (UN classification, 1-5)	X	E	C
	<p>This classifies the geographic region of the country according to the United Nations. It uses five categories: Africa, 1; Americas, 2; Asia, 3; Europe, 4; Oceania, 5.</p> <p>Examples: Swaziland, Africa; Cuba, Americas; Israel, Asia; Iceland, Europe; Micronesia, Oceania.</p>			
region9	Geographic region (World Bank classification, 1-9)	X	E	C

	This classifies the geographic region of the country according to the World Bank region. It uses nine categories: Eastern & Southern Africa, 1; West Africa, 2; East Asia & Oceania, 3; South Asia, 4; Eastern Europe & Central Asia, 5; Europe, 6; Middle East, 7; Americas, 9.			
oecd	OECD country (0/1)	X	E	C
	Is the country holding the election a member of the Organization for Economic Co-operation and Development (OECD)? This is a dichotomous variable (0, no; 1, yes). Examples: Angola, no; Slovenia, yes.			
OVERALLINTEGRITY	SECTION III. OVERALL INTEGRITY MEASURES			
PEIIndexp	Perceptions of Electoral Integrity Index (individual level)	X	E	C
	The PEI index is designed to provide an overall summary evaluation of expert perceptions that an election meets international standards and global norms. It is generated at the individual level using experts' answers to the 49 substantive variables below. Therefore, an Index score is missing if an expert does not answer a question. The 49 scores are summed and then standardized to a 100 point scale.			
PEIIndexp_lci	PEI Index (raw individual) , low ci		E	C
	The lower bound of the 95% confidence interval for either the election or the country level.			
PEIIndexp_hci	PEI Index (raw individual) , high ci		E	C
	The higher bound of the 95% confidence interval for either the election or the country level.			
PEIIndexi	Perceptions of Electoral Integrity Index (individual level imputed)	X	E	C
	The PEI index is designed to provide an overall summary evaluation of expert perceptions that an election meets international standards and global norms. It is generated at the individual level. Unlike the individual index (PEIIndexp) PEIIndexi is imputed and thus fully observed for all elections and countries. The imputation process was conducted in the following manner using Stata 13 at the expert unit of analysis. First, all 'Don't Knows' and 'Not Applicables' were replaced by missing values. The data were then imputed using multiple imputation and chained equations by section. The other variables in a section were thus used in the imputation equation along with five fully observed expert background characteristics (expertdomestic, sex, agegroup, region, and development). Twenty imputed values were then created for each variable taking 200 iterations after a 10 model burn-in. These values were collapsed to their mean value. Then in an identical manner used to generate PEIIndexp, the values for the 49 substantive variables were summed and standardized into a 0-100 point scale. The additive procedure has a very high reliability (Cronbach alpha= 0.964) and the obtained scale is very strongly correlated (R=0.997***) with the first underlying dimension extracted with Principal Component Analysis. For more detail on the multiple imputation procedure see Royston, Patrick. 2004. "Multiple imputation of missing values." <i>Stata Journal</i> 4: 227–241 and <i>Stata Multiple-Imputation Reference Manual: Release 13</i> . College Station, TX: Stata Press, 137-164.			
PEIIndexi_lci	PEI Index (imputed), low ci		E	C
	The lower bound of the 95% confidence interval for either the election or the country level.			
PEIIndexi_hci	PEI Index (imputed), high ci		E	C

	The higher bound of the 95% confidence interval for either the election or the country level.			
PEIIndex_rank	Rank of election according to PEI experts		E	C
	The position on the ranking based on the PEI Index.			
PEItype	PEI Index type (high, medium, low)			C
	Classification of the PEI Index on five categories: very low (0-40), low (40-49.9), moderate (50-59.9), high (60-69.9), very high (above 70)).			
rating	12-1. Rate electoral integrity of the election (1=very poor->10=very good)	X	E	C
	“Overall how would you rate the integrity of this election on a scale from 1 (very poor) to 10 (very good)?”			
rating_lci	Rating, low ci		E	C
	The lower bound of the 95% confidence interval for either the election or the country level.			
rating_hci	Rating, high ci		E	C
	The higher bound of the 95% confidence interval for either the election or the country level.			
LAWS	SECTION IV. ELECTORAL LAWS	X	E	C
	In the electoral law questions, all respondents read this header: “When thinking about the electoral laws used in the last national election in this country, do you agree or disagree with the following statements? 1. Electoral laws were unfair to smaller parties. 2. Electoral laws favored the governing party or parties. 3. Elections laws restricted citizens' rights.” The respondents gave their opinion in a five point Likert scale ranging from “Strongly disagree” to “Strongly agree”. Respondents also had the possibility to answer “Don’t know” and “Not applicable”.			
lawsunfair	1-1a. Electoral laws were unfair to smaller parties (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
lawsunfair2	1-1b. Electoral laws were unfair to smaller parties (Reversed coding)	X	E	C
	‘lawsunfair’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
favoredincumbent	1-2a. Electoral laws favored the governing party or parties (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
favoredincumbent2	1-2b. Electoral laws favored the governing party or parties (Reversed coding)	X	E	C
	‘favoredincumbent’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
citizens	1-3a. Elections laws restricted citizens' rights (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
citizens2	1-3b. Elections laws restricted citizens' rights (Reversed coding)	X	E	C
	‘citizens’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
laws	1-4. Electoral laws index (20-100)	X	E	C
	This is an additive scale created by summing the three previous variables (lawsunfari2,			

	favore Incumbent2, citizens2) and standardized to a 100 point scale.			
laws	1-4i. Electoral laws index (0-100), imputed	X	E	C
	This is an additive scale created by summing imputed versions of the three previous variables (lawsunfari2, favore Incumbent2, citizens2) and standardized to a 0-100 point scale.			
PROCEDURES	SECTION V. ELECTORAL PROCEDURES SECTION	X	E	C
	In the electoral law procedures section, all respondents read this header: “In terms of electoral procedures... Do you agree or disagree with the following statements? 4. Elections were well managed. 5. Information about voting procedures was widely available. 6. Election officials were fair. 7. Elections were conducted in accordance with the law.” The respondents gave their opinion in a five point Likert scale ranging from “Strongly disagree” to “Strongly agree”. Respondents also had the possibility to answer “Don’t know” and “Not applicable”.			
managed	2-1. Elections were well managed (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
votinginfo	2-2. Information about voting procedures was widely available (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
faiofficials	2-3. Election officials were fair (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
legalelections	2-4: Elections were conducted in accordance with the law (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
procedures	2-5. Electoral procedures index (20-100)	X	E	C
	This is an additive scale created by summing the four previous variables (managed, votinginfo, faiofficials, legalelections) and standardized to a 100 point scale.			
proceduresi	2-5i. Electoral procedures index (0-100), imputed	X	E	C
	This is an additive scale conformed by the four previous variables (managed, votinginfo, faiofficials, legalelections) and standardized to a 0-100 point scale.			
BOUNDARIES	SECTION VI. BOUNDARIES FOR DISTRICTS SECTION	X	E	C
	In the electoral law procedures section, all respondents read this header: “In some countries the electoral district boundaries are re-defined at intervals, a process also known as 'redistricting'. If this does not apply, please reply 'not applicable'. Do you agree or disagree with the following statements: 8. Boundaries discriminated against some parties. 9. Boundaries favored incumbents.			

	10. Boundaries were impartial.” The respondents gave their opinion in a five point Likert scale ranging from “Strongly disagree” to “Strongly agree”. Respondents also had the possibility to answer “Don’t know” and “Not applicable”.			
bdiscrim	3-1a. Boundaries discriminated against some parties (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
bdiscrim2	3-1b. Boundaries discriminated against some parties (Reversed coding)	X	E	C
	‘bdiscrim’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
bfavored	3-2a. Boundaries favored incumbents (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
bfavored2	3-2b. Boundaries favored incumbents (Reversed coding)	X	E	C
	‘bfavored’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
bimpartial	3-3. Boundaries were impartial (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
boundaries	3-4. Voting district boundaries index (20-100)	X	E	C
	This is an additive scale created by summing the four previous variables (managed, bdiscrim2, bfavored, boundaries) and standardized to a 100 point scale.			
boundariesi	3-4i. Voting district boundaries index (0-100), imputed	X	E	C
	This is an additive scale conformed by the four previous variables (managed, bdiscrim2, bfavored, boundaries) and standardized to a 0-100 point scale.			
VOTERREGISTRATION	SECTION VII. VOTER REGISTRATION	X	E	C
	In the voter registration section, all respondents read this header: “Turning to voter registration... Do you agree or disagree with the following statements 11. Some citizens were not listed in the register 12. The electoral register was inaccurate 13. Some ineligible electors were registered” The respondents gave their opinion in a five point Likert scale ranging from “Strongly disagree” to “Strongly agree”. Respondents also had the possibility to answer “Don’t know” and “Not applicable”.			
reglisted	4-1a. Some citizens were not listed in the register (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
reglisted2	4-1b. Some citizens were not listed in the register (Reversed coding)	X	E	C
	‘reglisted’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
reginaccurate	4-2a. The electoral register was inaccurate (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
reginaccurate2	4-2b. The electoral register was inaccurate (Reversed coding)	X	E	C

	'reginaccurate' reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
ineligible	4-3a. Some ineligible electors were registered (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
ineligible2	4-3b. Some ineligible electors were registered (Reversed coding)	X	E	C
	'inelegible' reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
votereg	4-4. Voter registration index (20-100)	X	E	C
	This is an additive scale conformed by the three previous variables (reglisted2, reginaccurate2, ineligible2) and standardized to a 100 point scale.			
voteregi	4-4i. Voter registration index (0-100), imputed	X	E	C
	This is an additive scale conformed by the three previous variables (reglisted2, reginaccurate2, ineligible2) and standardized to a 0-100 point scale.			
PARTYREGISTRATION	SECTION VIII. PARTY AND CANDIDATE REGISTRATION	X	E	C
	In the registration process section for parties and voters, all respondents read this header: "Thinking about the registration process for parties and candidates to get on the ballot... Do you agree or disagree with the following statements: 14. Some opposition candidates were prevented from running 15. Women had equal opportunities to run for office 16. Ethnic and national minorities had equal opportunities to run for office 17. Only top party leaders selected candidates 18. Some parties/candidates were restricted from holding campaign rallies" The respondents gave their opinion in a five point Likert scale ranging from "Strongly disagree" to "Strongly agree". Respondents also had the possibility to answer "Don't know" and "Not applicable".			
oppprevent	5-1a. Some opposition candidates were prevented from running (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
oppprevent2	5-1b. Some opposition candidates were prevented from running (Reversed coding)	X	E	C
	'oppprevent' reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
womenopp	5-2. Women had equal opportunities to run for office (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
minorityopp	5-3. Ethnic and national minorities had equal opportunities to run for office (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
leadersselect	5-4a. Only top party leaders selected candidates (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
leadersselect2	5-4b. Only top party leaders selected candidates (Reversed coding)	X	E	C
	'leadersselect' reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
rallies	5-5a. Some parties/candidates were restricted from holding campaign rallies (1-5)	X	E	C

	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
rallies2	5-5b. Some parties/candidates were restricted from holding campaign rallies (Reversed coding)	X	E	C
	'rallies' reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
partyreg	5-6. Party and candidate registration index (20-100)	X	E	C
	This is an additive scale conformed by the three previous variables (oppprevent2, womenopp, minorityopp, leaderselect2, rallies2) and standardized to a 100 point scale.			
partyregi	5-6i. Party and candidate registration index (0-100), imputed	X	E	C
	This is an additive scale conformed by the five previous variables (oppprevent2, womenopp, minorityopp, leaderselect2, rallies2) and standardized to a 0-100 point scale.			
MEDIACOVERAGE	SECTION IX. MEDIA COVERAGE	X	E	C
	In the media coverage section, all respondents read this header: "Thinking about the media's coverage of these elections, do you agree or disagree with the following statements: 19. Newspapers provided balanced election news. 20. TV news favored the governing party. 21. Parties/candidates had fair access to political broadcasts and advertising. 22. Journalists provided fair coverage of the elections. 23. Social media were used to expose electoral fraud." The respondents gave their opinion in a five point Likert scale ranging from "Strongly disagree" to "Strongly agree". Respondents also had the possibility to answer "Don't know" and "Not applicable".			
newspapers	6-1. Newspapers provided balanced election news (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
tv	6-2a. TV news favored the governing party (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
tv2	6-2b. TV news favored the governing party (Reversed coding)	X	E	C
	'tv' reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
fairaccess	6-3. Parties/candidates had fair access to political broadcasts and advertising (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
faircoverage	6-4. Journalists provided fair coverage of the elections (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
socialmedia	6-5. Social media were used to expose electoral fraud (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
media	6-6. Media coverage index (20-100)	X	E	C
	This is an additive scale conformed by the five previous variables (newspapers, tv2, fairaccess, faircoverage, socialmedia) and standardized to a 100 point scale.			
mediai	6-6i. Media coverage index (0-100), imputed	X	E	C
	This is an additive scale conformed by the five previous variables (newspapers, tv2, fairaccess, faircoverage, socialmedia) and standardized to a 0-100 point scale.			

CAMPAIGN FINANCE	SECTION X. CAMPAIGN FINANCE	X	E	C
	<p>In the campaign finance section, all respondents read this header:</p> <p>“Another issue concerns campaign finance, do you agree or disagree with the following statements...</p> <p>24. Parties/candidates had equitable access to public political subsidies. 25. Parties/candidates had equitable access to political donations. 26. Parties/candidates publish transparent financial accounts. 27. Rich people buy elections. 28. Some state resources were improperly used for campaigning”.</p> <p>The respondents gave their opinion in a five point Likert scale ranging from “Strongly disagree” to “Strongly agree”. Respondents also had the possibility to answer “Don’t know” and “Not applicable”.</p>			
subsidies	<p>7-1. Parties/candidates had equitable access to public political subsidies (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
donations	<p>7-2. Parties/candidates had equitable access to political donations (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
accounts	<p>7-3. Parties/candidates publish transparent financial accounts (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
rich	<p>7-4a. Rich people buy elections (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
rich2	<p>7-4b. Rich people buy elections (Reversed coding)</p> <p>‘rich’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.</p>	X	E	C
resources	<p>7-5a. Some state resources were improperly used for campaigning (1-5)</p> <p>Were some state resources improperly used for campaigning? Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
resources2	<p>7-5b. Some state resources were improperly used for campaigning (Reversed coding)</p> <p>‘resources’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.</p>	X	E	C
finance	<p>7-6. Campaign finance index (20-100)</p> <p>This is an additive scale conformed by the five previous variables (subsidies, donations, accounts, rich2,resources2) and standardized to a 100 point scale.</p>	X	E	C
financei	<p>7-6i. Campaign finance index (0-100), imputed</p> <p>This is an additive scale conformed by the five previous variables (subsidies, donations, accounts, rich2,resources2) and standardized to a 0-100 point scale.</p>	X	E	C
VOTING PROCESS	SECTION XI. VOTING PROCESS	X	E	C
	<p>In the voting section, all respondents read this header:</p>			

	<p>“When voting, do you agree or disagree with the following statements...</p> <p>29. Some voters were threatened with violence at the polls. 30. Some fraudulent votes were cast. 31. The process of voting was easy. 32. Voters were offered a genuine choice at the ballot box. 33. Postal ballots were available. 34. Special voting facilities were available for the disabled. 35. National citizens living abroad could vote. 36. Some form of internet voting was available”.</p> <p>The respondents gave their opinion in a five point Likert scale ranging from “Strongly disagree” to “Strongly agree”. Respondents also had the possibility to answer “Don’t know” and “Not applicable”.</p>			
violence	<p>8-1a. Some voters were threatened with violence at the polls (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
violence2	<p>8-1b. Some voters were threatened with violence at the polls (Reversed coding)</p> <p>‘violence’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.</p>	X	E	C
fraudulent	<p>8-2a. Some fraudulent votes were cast (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
fraudulent2	<p>8-2b. Some fraudulent votes were cast (Reversed coding)</p> <p>‘fraudulent’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.</p>	X	E	C
easy	<p>8-3. The process of voting was easy (1-1)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
choice	<p>8-4. Voters were offered a genuine choice at the ballot box (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
postal	<p>8-5. Postal ballots were available (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
disabled	<p>8-6. Special voting facilities were available for the disabled (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
expats	<p>8-7. National citizens living abroad could vote (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
internet	<p>8-8. Some form of internet voting was available (1-5)</p> <p>Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.</p>	X	E	C
voting	<p>8-9. Voting process index (20-100)</p> <p>This is an additive scale conformed by the eight previous variables (violence2, fraudulent2, easy, choice, postal, disabled, expats, internet) and standardized to a 100 point scale.</p>	X	E	C
votingi	<p>8-9i. Voting process index (0-100), imputed</p> <p>This is an additive scale conformed by the eight previous variables (violence2, fraudulent2, easy, choice, postal, disabled, expats, internet) and standardized to a 0-100</p>	X	E	C

	point scale.			
VOTE COUNT	SECTION XII. VOTE COUNT	X	E	C
	In the vote counting section, all respondents read this header: “When voting... Do you agree or disagree with the following statements... 37. Ballot boxes were secure. 38. The results were announced without undue delay. 39. Votes were counted fairly. 40. International election monitors were restricted. 41. Domestic election monitors were restricted”. The respondents gave their opinion in a five point Likert scale ranging from “Strongly disagree” to “Strongly agree”. Respondents also had the possibility to answer “Don’t know” and “Not applicable”.			
secure	9-1. Ballot boxes were secure (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
delay	9-2. The results were announced without undue delay (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
faircount	9-3. Votes were counted fairly (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
intlmonitors	9-4a. Int'l election monitors were restricted (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
intlmonitors2	9-4b. Int'l election monitors were restricted (Reversed coding)	X	E	C
	‘intlmonitors’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
domesticmonitors	9-5a. Domestic election monitors were restricted (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
domesticmonitors2	9-5b. Domestic election monitors were restricted (Reversed coding)	X	E	C
	‘domesticmonitors’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
count	9-6. Vote count index (20-100)	X	E	C
	This is an additive scale conformed by the five previous variables (secure, delay, faircount, intlmonitors2, domesticmonitors2) and standardized to a 100 point scale.			
counti	9-6i. Vote count index (0-100), imputed	X	E	C
	This is an additive scale conformed by the five previous variables (secure, delay, faircount, intlmonitors2, domesticmonitors2) and standardized to a 0-100 point scale.			
VOTING RESULTS	SECTION XIII. VOTING RESULTS	X	E	C
	In the announcement of the results section, all respondents read this header: “After the official results were announced, do you agree or disagree with the following statements...”			

	<p>42. Parties/candidates challenged the results. 43. The election led to peaceful protests. 44. The election triggered violent protests. 45. Any disputes were resolved through legal channels.”</p> <p>The respondents gave their opinion in a five point Likert scale ranging from “Strongly disagree” to “Strongly agree”. Respondents also had the possibility to answer “Don’t know” and “Not applicable”.</p>			
challenged	10-1a. Parties/candidates challenged the results (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
challenged2	10-1b. Parties/candidates challenged the results (Reversed coding)	X	E	C
	‘challenged’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
protestspace	10-2a. The election led to peaceful protests (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
protestspace2	10-2b. The election led to peaceful protests (Reversed coding)	X	E	C
	‘protestspace’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
protestsviolent	10-3a. The election triggered violent protests (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
protestsviolent2	10-3b. The election triggered violent protests (Reversed coding)	X	E	C
	‘protestsviolent’ reversed coding: Strongly Disagree, 5; Disagree, 4; Neither agree nor disagree, 3; Agree, 2; Strongly Agree, 1.			
disputes	10-4. Any disputes were resolved through legal channels (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
results	10-5. Results index (20-100)	X	E	C
	This is an additive scale conformed by the four previous variables (challenged2, protestspace2, protestsviolent2, disputes) and standardized to a 100 point scale.			
resultsi	10-5i. Results index (0-100), imputed	X	E	C
	This is an additive scale conformed by the four previous variables (challenged2, protestspace2, protestsviolent2, disputes) and standardized to a 0-100 point scale.			
ELECTION AUTHORITIES	SECTION XIV. ELECTORAL AUTHORITIES	X	E	C
	<p>In the electoral authorities section, all respondents read this header:</p> <p>“Thinking about the electoral authorities administering elections, in your view... Do you agree or disagree with the following statements...</p> <p>46. The election authorities were impartial. 47. The authorities distributed information to citizens. 48. The authorities allowed public scrutiny of their performance. 49. The election authorities performed well.”</p> <p>The respondents gave their opinion in a five point Likert scale ranging from “Strongly</p>			

	disagree” to “Strongly agree”. Respondents also had the possibility to answer “Don’t know” and “Not applicable”.			
impartial	11-1. The election authorities were impartial (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
info	11-2. The authorities distributed information to citizens (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
scrutiny	11-3. The authorities allowed public scrutiny of their performance (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
performance	11-4. The election authorities performed well (1-5)	X	E	C
	Coded: Strongly Disagree, 1; Disagree, 2; Neither agree nor disagree, 3; Agree, 4; Strongly Agree, 5.			
EMBs	11-5. Electoral authorities index (20-100)	X	E	C
	This is an additive scale conformed by the four previous variables (impartial, info, scrutiny, performance) and standardized to a 100 point scale.			
EMBSi	11-5i. Electoral authorities index (0-100), imputed	X	E	C
	This is an additive scale conformed by the four previous variables (impartial, info, scrutiny, performance) and standardized to a 0-100 point scale.			
GENERALQUESTIONS	SECTION XV. GENERAL ELECTION	X	E	C
	In this section, all respondents read the following questions: “Overall, how familiar are you with elections in this country, on a scale from 1 (not familiar) to 10 (very familiar)? If there was more than one election held simultaneously, which one do you consider the most important?”			
familiarity	13-1. How familiar are you with elections in this country?	X	E	C
	This categorical variable asks the expert to rate her familiarity with the election on a one to ten scale, where 1 is not familiar and 10 is very familiar.			
important	13-2. Which election (if more than one) was most important?	X	E	C
	In many countries elections for different offices are held in the same day. For instance, in the United States, the Presidential election on 6 November of 2012 was held jointly with Congressional elections for the House and the Senate. Since the survey asks experts to provide their evaluation of only one contest, the respondents can point out which election they consider is more important.			
ORGCONFIDENCE	SECTION XVI. ORGANIZATIONAL CONFIDENCE	X	E	C
	In the organizational confidence section, all respondents read this header: “Lastly, we are interested in your views about organizations. For each one, could you please rate how much confidence you have in those organizations in this country, from a 1 (no confidence at all) to 10 (a great deal of confidence) scale? The Courts/ The Government/ Parliament/ The armed forces/The police/ Electoral authorities/ Television/ The press/ Political parties”.			

courts	14-1. Confidence in the courts (1=none - 10=a great deal)	X	E	C
	This categorical variable asks about degree of confidence that the respondent has on the court of the country in which the election was celebrated. It ranges from 1 (no confidence) to 10 (a great deal of confidence).			
government	14-2. Confidence in the government (1=none - 10=a great deal)	X	E	C
	This categorical variable asks about degree of confidence that the respondent has on the government of the country in which the election was celebrated. It ranges from 1 (no confidence) to 10 (a great deal of confidence).			
parliament	14-3. Confidence in the parliament (1=none - 10=a great deal)	X	E	C
	This categorical variable asks about degree of confidence that the respondent has on the parliament of the country in which the election was celebrated. It ranges from 1 (no confidence) to 10 (a great deal of confidence).			
armedforces	14-4. Confidence in the armed forces (1=none - 10=a great deal)	X	E	C
	This categorical variable asks about degree of confidence that the respondent has on the armed forces of the country in which the election was celebrated. It ranges from 1 (no confidence) to 10 (a great deal of confidence).			
police	14-5. Confidence in the police (1=none - 10=a great deal)	X	E	C
	This categorical variable asks about degree of confidence that the respondent has on the police of the country in which the election was celebrated. It ranges from 1 (no confidence) to 10 (a great deal of confidence).			
	<i>Note: Since 2016, this item is not asked.</i>			
electoralauth	14-6. Confidence in the election authorities (1=none - 10=a great deal)	X	E	C
	This categorical variable asks about degree of confidence that the respondent has on the electoral authorities of the country in which the election was celebrated. It ranges from 1 (no confidence) to 10 (a great deal of confidence).			
television	14-7. Confidence in television (1=none - 10=a great deal)	X	E	C
	This categorical variable asks about degree of confidence that the respondent has on the television of the country in which the election was celebrated. It ranges from 1 (no confidence) to 10 (a great deal of confidence).			
	<i>Note: Since 2016, this item is not asked.</i>			
press	14-8. Confidence in the press (1=none - 10=a great deal)	X	E	C
	This categorical variable asks about degree of confidence that the respondent has on the press of the country in which the election was celebrated. It ranges from 1 (no confidence) to 10 (a great deal of confidence).			
	<i>Note: Since 2016, this item is not asked.</i>			
parties	14-9. Confidence in political parties (1=none - 10=a great deal)	X	E	C
	This categorical variable asks about degree of confidence that the respondent has on the parties of the country in which the election was celebrated. It ranges from 1 (no confidence) to 10 (a great deal of confidence).			
	<i>Note: Since 2016, this item is not asked.</i>			
BACKGROUND	SECTION XVII. EXPERT BACKGROUND	X	E	C
	In this section, all experts are asked various questions about their background.			
expertdomestic	15-0. Domestic expert?	X	E	C
	Domestic experts are living in the country of the election while the international expert is			

	someone with expertise in the country but living in a different country. Expert-level: individual domestic expert or not (0/1). Election level: % of domestic experts. Country level: % of domestic experts.			
employment	15-1. Employment type	X	E	C
	Question: Are you currently in full or part-time paid employment? Respondents had three options: Not currently in paid employment, 1; Part-time, 2; and Full time 3.			
public	15-2. Works (or has worked) in the government public sector	X	E	C
	Question: Do you work, or have you worked, in the public sector? Respondents had two options: no, 0; yes,1.			
university	15-3. Works (or has worked) in a university	X	E	C
	Question: Do you work, or have you worked, in university? Respondents had two options: no, 0; yes,1.			
nonprofit	15-4. Works (or has worked) in private non-profit sector/NGOs	X	E	C
	Question: Do you work, or have you worked, in the private non-profit sector/NGOs? Respondents had two options: no, 0; yes,1.			
agency	15-5. Works (or has worked) in an international agency	X	E	C
	Question: Do you work, or have you worked, in an international agency? Respondents had two options: no, 0; yes,1.			
private	15-6. Works (or has worked) in a private business or industry	X	E	C
	Question: Do you work, or have you worked, in a private business or industry? Respondents had two options: no, 0; yes,1.			
occupation	15-7. Most recent occupation	X	E	C
	Question: What is (or was) your most recent primary employment? Respondents most recent occupation was coded as: Civil servant/local government (1), Electoral official (2), International official or consultant (3), Journalist/reporter/broadcaster/blogger/citizen journalist (4), Lawyer/legal profession (5), Scholar/teacher/researcher/academic (6), Manager or professional (7), Elected representative/politician (8), Not applicable/don't know (9).			
agegroup	15-8a. Expert's age group (by decade)	X	E	C
	Expert of the age recoded by the decade the expert was born.			
sex	15-9. Sex	X	E	C
	Question: What is your sex? It is a dichotomous variable: male (0), female (1).			
education	15-10. Highest level of education	X	E	C
	Question: What is your highest level of educational qualification? The response categories for the educational attainment are: No formal education (1), Primary school (2), Secondary school (3), University-level education with under-graduate degree (4), University-level education, with post-graduate degree (5).			
born	15-11. Were you born in this country?	X	E	C
	Question: Were you born in this country? It is a dichotomous variable: no (0), yes (1)			
lived	15-12. Number years lived in this country	X	E	C
	Question: How long have you lived in this country, if at all? Respondents had five response categories: Never lived in this country (0), Less than 12 months (1), 1-4 years (2), 5-9 years (3), 10 years or more (4), all my life (5).			
candidate	15-13. Expert was a candidate for elected office	X	E	C
	Question: Did you participate in the last national election of this country as an elected representative? Respondents had two options: no, 0; yes,1.			

rep	15-14. Expert was an elected representative	X	E	C
	Question: Did you participate in the last national election of this country as an elected representative? Respondents had two options: no, 0; yes,1.			
activist	15-15. Expert was an election activist	X	E	C
	Question: Did you participate in the last national election of this country as an election activist? Respondents had two options: no, 0; yes,1.			
ngo	15-16. Expert was election NGO watch personnel	X	E	C
	Question: Did you participate in the last national election of this country as an election NGO watch? Respondents had two options: no, 0; yes,1.			
voted	15-17. Expert voted in this election	X	E	C
	Question: Did you participate in the last national election of this country as a voter? Respondents had two options: no, 0; yes,1.			
norole	15-18. Expert did not participate in any role in this election	X	E	C
	Question: Did you participate in the last national election of this country in any of the following roles? Respondents had two options: no, 0; yes,1.			
monitor	15-19. Expert was a national official electoral monitor	X	E	C
	Question: Did you participate in the last national election of this country as a national official elector monitor? Respondents had two options: no, 0; yes,1.			
monitorint	15-19a. Expert was an international official electoral monitor	X	E	C
	Question: Did you participate in the last national election of this country as an international official elector monitor? Respondents had two options: no, 0; yes,1.			
official	15-20. Expert was an election official	X	E	C
	Question: Did you participate in the last national election of this country as an election official? Respondents had two options: no, 0; yes,1.			
citizen	15-21. Expert is a citizen of this country (0/1)	X	E	C
	Question: Are you a citizen of this country? Respondents had two options: no, 0; yes,1.			
supported	15-22. Support the winning or losing side	X	E	C
	Question: Which political party, if any, did you support in the last national election? Experts responded the parties they voted. Their answers were recoded into 7 categories: winner (1), loser (2), no party (3), did not vote (4), decline to answer (5), independent (6), no answer (7).			
leftrightscale	15-23. Political views on 10pt left/right scale	X	E	C
	Question: Below is a 10 point scale on which the political views are arranged from very left to very right. Where would you place your views on this scale? Respondents used the left/right scale to place their personal ideological stance, one being very left and 10 very right.			
difficulty	How difficult did you find the survey	X		
	Question: Overall, how easy or difficult did you find the questions? On a scale of 1 to 10 where 1 means the questionnaire was 'very difficult to understand' and 10 means the questionnaire was 'very easy to understand'. Respondents had to evaluate in a scale of from 1 to 10.			
VIGNETTES	SECTION XVIII. VIGNETTES	X	E	C

	In the organizational confidence section, all respondents read this header: "Here we are interested in learning your views more generally about situations which can occur in different contests."			
vignetteA	16-1. Vignette A (Queues) Question: How seriously do you think that electoral integrity is undermined if in COUNTRY A some voters had to wait in long lines to vote? Respondents were asked to give their opinion in a 1 to 10 scale were 1 means that electoral integrity is not seriously undermined and 10 means that electoral integrity is seriously undermined.	X	E	C
vignetteB	16-2. Vignette B (Boycotts) Question: How seriously do you think that electoral integrity is undermined in COUNTRY B if the opposition decides to boycott an election, so that the government wins most seats by default? Respondents were asked to give their opinion in a 1 to 10 scale were 1 means that electoral integrity is not seriously undermined and 10 means that electoral integrity is seriously undermined.	X	E	C

	The name of the 2 nd party in a parliamentary election, or the name of the 1st candidate's party in a presidential election. Examples: Albania, Democratic Party of Albania; Zimbabwe, Movement for Democratic Change.			
P3Name	Party 3: Name/ Candidate 3 in presidential election		E	
	The name of the 3 rd party in a parliamentary election, or the name of the 1st candidate's party in a presidential election. Examples: Albania, Socialist Movement for Integration; Zimbabwe, Movement for Democratic Change Ncube.			
P4Name	Party 4: Name/ Candidate 4 in presidential election		E	
	The name of the 4 th party in a parliamentary election, or the name of the 1st candidate's party in a presidential election.			

	Examples: Albania, Republican Party; Zimbabwe, Independents.		
P5Name	Party 5: Name/ Candidate 5 in presidential election		E
	The name of the 5 th party in a parliamentary election, or the name of the 1st candidate's party in a presidential election. Examples: Albania, The Unity for Human Rights Party; Montenegro, Bosniak Party.		
P6Name	Party 6: Name/ Candidate 6 in presidential election		E
	The name of the 6 th party in a parliamentary election, or the name of the 1st candidate's party in a presidential election. Examples: Azerbaijan, The Justice Party; Lithuania, Order and Justice.		
P7Name	Party 7: Name/ Candidate 7 in presidential election		E
	The name of the 7 th party in a parliamentary election, or the name of the 1st candidate's party in a presidential election. Examples: Lithuania, Electoral Action of Poles in Lithuania; Netherlands, Christian Union.		
P8Name	Party 8: Name/ Candidate 8 in presidential election		E
	The name of the 8 th party in a parliamentary election, or the name of the 1st candidate's party in a presidential election. Examples: Lithuania, Lithuanian Peasants and Greens Union; Netherlands, Green Left.		
P9Name	Party 9: Name/ Candidate 9 in presidential election		E
	The name of the 9 th party in a parliamentary election, or the name of the 1st candidate's party in a presidential election. Examples: Netherlands, Reformed Political Party; Israel, United Arab List - Arab Movement for Renewal.		
P10Name	Party 10: Name/ Candidate 10 in presidential election		E
	The name of the 10 th party in a parliamentary election, or the name of the 1st candidate's party in a presidential election. Examples: Israel, The Democratic Front for Peace and Equality; Burkina Faso, The Other Burkina Faso.		
P1Abb	Party 1: Abbreviation		E
	Abbreviation of the first party (most votes). Examples: Albania, PS; Austria, SPÖ; Zimbabwe, ZANU PDF.		
P2Abb	Party 2: Abbreviation		E
	Abbreviation of the second party. Examples: Albania, PD; Austria, ÖVP; Zimbabwe, MDC.		
P3Abb	Party 3: Abbreviation		E
	Abbreviation of the third party. Examples: Albania, LSI; Austria, FPÖ; Zimbabwe, MDC.		
P4Abb	Party 4: Abbreviation		E
	Abbreviation of the fourth party. Examples: Azerbaijan, BAXCP; Belarus, RPTS; Ukraine, CPU.		
P5Abb	Party 5: Abbreviation		E
	Abbreviation of the fifth party. Examples: Burkina Faso, PDS; Cameroon, UPC; Paraguay, FG.		
P6Abb	Party 6: Abbreviation		E
	Abbreviation of the sixth party. Examples: Burkina Faso, UPR; Cameroon, UPC; Paraguay, FG.		
P7Abb	Party 7: Abbreviation		E
	Abbreviation of the seventh party. Examples: Burkina Faso, CFBD; Cameroon, MDR; Netherlands, CU.		
P8Abb	Party 8: Abbreviation		E
	Abbreviation of the eighth party. Examples: Burkina Faso, ODT; Ghana, UFP; Netherlands, GL.		
P9Abb	Party 9: Abbreviation		E

	Abbreviation of the ninth party. Examples: Burkina Faso, UNDD; Israel, Ra'am; Netherlands, SGP.			
P10Abb	Party 10: Abbreviation			E
	Abbreviation of the tenth party. Examples: Burkina Faso, FA; Israel, Hadash; Netherlands, PvdD.			
P1Lead	Party 1: Leader/ Candidate 1 in presidential election			E
	The leader of the 1 st party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Albania, Edi Rama; Ecuador, Rafael Correa; Ghana, John Dramani Mahama.			
P2Lead	Party 2: Leader/ Candidate 2 in presidential election			E
	The leader of the 2 nd party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Albania, Sali Berisha; Ecuador, Guillermo Alberto Lasso; Ghana, Nana Addo Dankwa Akufo-Addo.			
P3Lead	Party 3: Leader/ Candidate 3 in presidential election			E
	The leader of the 3 rd party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Albania, Ilir Meta; Ecuador, Mauricio Rodas Espinel; Ghana, Sidya Toure.			
P4Lead	Party 4: Leader/ Candidate 4 in presidential election			E
	The leader of the 4 th party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Albania, Fatmir Mediu; Ecuador, Alberto Costa Espinosa; Ghana, Henry Herbert Lartey.			
P5Lead	Party 5: Leader/ Candidate 5 in presidential election			E
	The leader of the 5 th party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Albania, Vangjel Dule; Ecuador, Norman Stef Wray Reyes; Ghana, Ayariga Hassan.			
P6Lead	Party 6: Leader/ Candidate 6 in presidential election			E
	The leader of the 6 th party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Armenia, Vardan Sedrakyan; Ecuador, Nelson Martin Zavala Avellan; Ghana, Michael Abu Sakara Foster.			
P7Lead	Party 7: Leader/ Candidate 7 in presidential election			E
	The leader of the 7 th party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Azerbaijan, Araz Alizade; Ghana, Jacob Osei Yeboah; Honduras, Jorge Aguilar Paredes.			
P8Lead	Party 8: Leader/ Candidate 8 in presidential election			E
	The leader of the 8 th party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Azerbaijan, Farac Quliyev; Honduras, Andrés Pavón; Kenya, Paule Muite.			
P9Lead	Party 9: Leader/ Candidate 9 in presidential election			E
	The leader of the 9 th party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Azerbaijan, Hafiz Hacıyev; Netherlands, Kees van der Staaij.			
P10Lead	Party 10: Leader/ Candidate 10 in presidential election			E
	The leader of the 10 th party in a parliamentary election, or the name of the 1st candidate in a presidential election. Examples: Azerbaijan, Sardar Calaloglu; Israel, Mohammad Barakeh.			
P1PreSeats	Party 1: Seats in previous elections			E
	Seats won by Party 1 in the previous election. Examples: Albania, 65; Germany, 239; Ukraine, 175.			

P2PreSeats	Party2: Seats in previous elections Seats won by Party 2 in the previous election. Examples: Albania, 68; Germany, 146; Ukraine, 228.	E
P3PreSeats	Party 3: Seats in previous elections Seats won by Party 3 in the previous election. Examples: Albania, 4; Germany, 76; Ukraine, 0.	E
P4PreSeats	Party 4: Seats in previous elections Seats won by Party 4 in the previous election. Examples: Albania, 1; Germany, 68; Israel, 3.	E
P5PreSeats	Party 5: Seats in previous elections Seats won by Party 5 in the previous election. Examples: Albania, 1; Israel, 11; Montenegro, 1.	E
P6PreSeats	Party 6: Seats in previous elections Seats won by Party 6 in the previous election. Examples: Australia, 4; Lithuania, 15; Nepal, 54.	E
P7PreSeats	Party 7: Seats in previous elections Seats won by Party 7 in the previous election. Examples: Lithuania, 3; Nepal, 21; Norway, 11.	E
P8PreSeats	Party 8: Seats in previous elections Seats won by Party 8 in the previous election. Examples: Israel, 3; Lithuania, 3; Netherlands, 10.	E
P9PreSeats	Party 9: Seats in previous elections Seats won by Party 9 in the previous election. Examples: Israel, 4; Netherlands, 2.	E
P10PreSeats	Party 10: Seats in previous elections Seats won by Party 10 in the previous election. Examples: Israel, 3; Netherlands, 2.	E
TotSeats	Number of Contested Seats Number of contested seats in the election. Examples: Angola, 220; Iceland, 63; Zimbabwe, 270.	E
P1Seats	Party 1: Seats Number of seats won by Party 1. Examples: Angola, 175; Iceland, 19; Zimbabwe, 197.	E
P2Seats	Party 2: Seats Number of seats won by Party 2. Examples: Angola, 32; Iceland, 19; Zimbabwe, 70.	E
P3Seats	Party 3: Seats Number of seats won by Party 3. Examples: Angola, 8; Iceland, 9; Zimbabwe, 2.	E
P4Seats	Party 4: Seats Number of seats won by Party 4. Examples: Angola, 3; Iceland, 7; Zimbabwe, 1.	E
P5Seats	Party 5: Seats Number of seats won by Party 5. Examples: Angola, 2; Iceland, 6; Turkmenistan, 7.	E
P6Seats	Party 6: Seats Number of seats won by Party 6. Examples: Austria, 9; Iceland, 3; Pakistan, 3.	E
P7Seats	Party 7: Seats Number of seats won by Party 7. Examples: Burkina Faso, 3; Israel, 6; Lithuania, 8.	E

P8Seats	Party 8: Seats Number of seats won by Party 8. Examples: Israel, 6; Lithuania, 1; Nepal, 6.	E
P9Seats	Party 9: Seats Number of seats won by Party 9. Examples: Burkina Fasso, 1; Israel, 4; Netherlands, 3.	E
P10Seats	Party 10: Seats Number of seats won by Party 10. Examples: Israel, 4; Netherlands, 2.	E
P1SeatChange	Party 1: Seat change compared to previous election Number of party 1 seats change from previous election. Examples: Angola, MPLA: -16 seats; Cambodia, CPP: -22.	E
P2SeatChange	Party 2: Seat change compared to previous election Number of party 2 seats change from previous election. Examples: Angola, Unita:16 ; Belarus, KBP: -3.	E
P3SeatChange	Party 3: Seat change compared to previous election Number of party 3 seats change from previous election. Examples: Angola, CASA: 8; Albania, LSI: 12.	E
P4SeatChange	Party 4: Seat change compared to previous election Number of party 4 seats change from previous election. Examples: Albania, PR: 2; Iceland, LGM: -7.	E
P5SeatChange	Party 5: Seat change compared to previous election Number of party 5 seats change from previous election. Examples: Albania, PBDNJ: 3; Japan, JCP: 5.	E
P6SeatChange	Party 6: Seat change compared to previous election Number of party 6 seats change from previous election. Examples: Austria, NEOS: 9; Guinea, NGR: 1.	E
P7SeatChange	Party 7: Seat change compared to previous election Number of party 7 seats change from previous election. Examples: Japan, SDP: -1; Norway, SVP: -4.	E
P8SeatChange	Party 8: Seat change compared to previous election Number of party 8 seats change from previous election. Examples: Japan, SPDJ: -3; Netherlands, GL: -6.	E
P9SeatChange	Party 9: Seat change compared to previous election Number of party 9 seats change from previous election. Examples: Czech Republic, SZ: 1; Netherlands, SGP: 1.	E
P10SeatChange	Party 10: Seat change compared to previous election Number of party 10 seats change from previous election. Examples: Israel, Hadash: 1.	E
P1PerSeats	Party 1: Seat share Percentage of seats obtained by party 1. Examples: Angola,79.5%; Iceland, 30.15%; Zimbabwe, 72.96%.	E
P2PerSeats	Party 2: Seat share Percentage of seats obtained by party 2. Examples: Angola, 14.54%; Iceland, 30.15%; Zimbabwe, 25.92%.	E
P3PerSeats	Party 3: Seat share Percentage of seats obtained by party 3. Examples: Angola, 3.63%; Iceland, 14.28%; Zimbabwe, .74%.	E
P4PerSeats	Party 4: Seat share Percentage of seats obtained by party 4. Examples: Angola, 1.36%; Iceland, 11.11%; Zimbabwe, .37%.	E

P5PerSeats	Party 5: Seat share Percentage of seats obtained by party 5. Examples: Angola, .9%; Iceland, 9.52%; Turkmenistan, 5.6%.	E
P6PerSeats	Party 6: Seat share Percentage of seats obtained by party 6. Examples: Austria, 4.91%; Iceland, 4.76%; Pakistan, .87%.	E
P7PerSeats	Party 7: Seat share Percentage of seats obtained by party 7. Examples: Burkina Faso, 2.36%; Israel, 5%; Lithuania, 5.67%.	E
P8PerSeats	Party 8: Seat share Percentage of seats obtained by party 8. Examples: Israel, 5; Lithuania, .7%; Nepal, .99%.	E
P9PerSeats	Party 9: Seat share Percentage of seats obtained by party 9. Examples: Burkina Fasso, .78%; Israel, 3.33%; Netherlands, 2%.	E
P10PerSeats	Party 10: Seat share Percentage of seats obtained by party 10. Examples: Israel, 3.33%; Netherlands, 1.33%.	E
P1Vote	Party 1: Votes Number of votes by party 1. Examples: Angola,4135503; Iceland, 50454; Zimbabwe, 2120634.	E
P2Vote	Party 2: Votes Number of votes by party 2. Examples: Angola,1074565; Iceland, 46173; Zimbabwe, 1008023.	E
P3Vote	Party 3: Votes Number of votes by party 3. Examples: Angola,345589; Iceland, 24292; Zimbabwe, 158263.	E
P4Vote	Party 4: Votes Number of votes by party 4. Examples: Angola,98223; Iceland, 20546; Zimbabwe, 76044.	E
P5Vote	Party 5: Votes Number of votes by party 5. Examples: Angola, 65163; Iceland, 15583; Turkmenistan .	E
P6Vote	Party 6: Votes Number of votes by party 6. Examples: Austria, 229692; Iceland, 9647; Pakistan, 1409905.	E
P7Vote	Party 7: Votes Number of votes by party 7. Examples: Burkina Faso, 72299; Israel, 189168; Lithuania, 79829.	E
P8Vote	Party 8: Votes Number of votes by party 8. Examples: Israel, 172340; Lithuania, 53112; Nepal, 133271.	E
P9Vote	Party 9: Votes Number of votes by party 9. Examples: Burkina Faso, 43795; Israel, 138362; Netherlands, 196780.	E
P10Vote	Party 10: Votes Number of votes by party 10. Examples: Israel, 113610; Netherlands, 182162.	E
P1PerVote	Party 1: Vote share Percentage of votes obtained by party 1. Examples: Angola, 71.84%; Iceland, 26.69%; Zimbabwe, 62.8%.	E

P2PerVote	Party 2: Vote share Percentage of votes obtained by party 2. Examples: Angola, 18.66%; Iceland, 24.43%; Zimbabwe, 29.8%.	E
P3PerVote	Party 3: Vote share Percentage of votes obtained by party 3. Examples: Angola, 6%; Iceland, 12.85%; Zimbabwe, 4.7%.	E
P4PerVote	Party 4: Vote share Percentage of votes obtained by party 4. Examples: Angola, 1.7%; Iceland, 10.87%; Zimbabwe, 2.3%.	E
P5PerVote	Party 5: Vote share Percentage of votes obtained by party 5. Examples: Angola, 1.13%; Iceland, 8.24%; Turkmenistan .	E
P6PerVote	Party 6: Vote share Percentage of votes obtained by party 6. Examples: Austria, 4.92%; Iceland, 5.1%; Pakistan, 3.1%.	E
P7PerVote	Party 7: Vote share Percentage of votes obtained by party 7. Examples: Burkina Faso, 2.39%; Israel, 4.98%; Lithuania, 6.09%.	E
P8PerVote	Party 8: Vote share Percentage of votes obtained by party 8. Examples: Israel, 4.54%; Lithuania, 4.05%; Nepal, 1.4%.	E
P9PerVote	Party 9: Vote share Percentage of votes obtained by party 9. Examples: Burkina Faso, 1.45%; Israel, 3.64%; Netherlands, 2.08%.	E
P10PerVote	Party 10: Vote share Percentage of votes obtained by party 10. Examples: Israel, 2.9%; Netherlands, 1.93%.	E
MinorNumber	Number of minor parties beyond the top 5 Number of parties beyond the top 5 parties. Examples: Australia, 2; Israel, 5; Pakistan, 2.	E
MinorSeat	Seats of minor parties Number of seats of the parties beyond the top 5. Examples: Cameroon, 2; Israel, 27.	E
MinorVote	Votes of minor parties Number of votes of the minor parties. Examples: Iran, 446015; Lithuania, 233019.	E
MinorPerSeat	Seat share of minor parties Share of seats of the minor parties. Examples: Iran, 0; Lithuania: 14.18%.	E
MinorPerVote	Vote share of minor parties Share of votes of the minor parties. Examples: Iran, 0%; Lithuania, 17.7%.	E
P1Incum	Party 1: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 1 (yes); Lithuania, 0 (no).	E
P2Incum	Party 2: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 0 (no); Lithuania, 0 (no).	E
P3Incum	Party 3: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 0 (no); Cameroon, 1 (yes).	E

P4Incum	Party 4: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 0 (no); Albania, 0 (no).		E
P5Incum	Party 5: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 0 (no); Norway, 1 (yes).		E
P6Incum	Party 6: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 0 (no); Philippines, 1 (yes).		E
P7Incum	Party 7: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 0 (no); Norway, 1 (yes).		E
P8Incum	Party 8: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 0 (no); Japan, 1 (yes).		E
P9Incum	Party 9: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 0 (no); Azerbaijan, 0 (no).		E
P10Incum	Party 10: Incumbent Party Was this party/candidate in government before the election? Examples: Angola, 0 (no); Azerbaijan, 0 (no).		E
P1Govt	Party 1: Government Party Was this party/candidate in government after the election? Examples: Angola, 1 (yes); Norway, 0 (no).		E
P2Govt	Party 2: Government Party Was this party/candidate in government after the election? Examples: Angola, 0 (no); Australia, 1 (yes).		E
P3Govt	Party 3: Government Party Was this party/candidate in government after the election? Examples: Angola, 0 (no); Albania, 1 (yes).		E
P4Govt	Party 4: Government Party Was this party/candidate in government after the election? Examples: Angola, 0 (no); Israel, 1 (yes).		E
P5Govt	Party 5: Government Party Was this party/candidate in government after the election? Examples: Angola, 0 (no); Philippines, 1 (yes).		E
P6Govt	Party 6: Government Party Was this party/candidate in government after the election? Examples: Azerbaijan, 0 (no); Burkina Faso, 1 (yes).		E
P7Govt	Party 7: Government Party Was this party/candidate in government after the election? Examples: Azerbaijan, 0 (no); Israel, 1 (yes).		E
P8Govt	Party 8: Government Party Was this party/candidate in government after the election? Examples: Azerbaijan, 0 (no); Chile, .		E
P9Govt	Party 9: Government Party Was this party/candidate in government after the election? Examples: Azerbaijan, 0 (no); Burkina Faso, 1 (yes).		E
P10Govt	Party 10: Government Party Was this party/candidate in government after the election? Examples: Azerbaijan, 0 (no); Burkina Faso, 1 (yes).		E

P1Change	P1Change Did Party 1 Enter or Exit the Government? Examples: Angola, no change; Albania, enter; Australia, exit.	E
P2Change	P2Change Did Party 1 Enter or Exit the Government? Examples: Angola, no change; Albania, exit.	E
P3Change	P3Change Did Party 1 Enter or Exit the Government? Examples: Angola, no change; Bulgaria, enter.	E
P4Change	P4Change Did Party 1 Enter or Exit the Government? Examples: Angola, no change; Albania, exit.	E
P5Change	P5Change Did Party 1 Enter or Exit the Government? Examples: Angola, no change; Netherlands, exit.	E
P6Change	P6Change Did Party 1 Enter or Exit the Government? Examples: Lithuania, enter; Australia, no change.	E
P7Change	P7Change Did Party 1 Enter or Exit the Government? Examples: Australia, no change.	E
P8Change	P8Change Did Party 1 Enter or Exit the Government? Examples: Azerbaijan, no change.	E
P9Change	P9Change Did Party 1 Enter or Exit the Government? Examples: Azerbaijan, no change.	E
P10Change	P10Change Did Party 1 Enter or Exit the Government? Examples: Azerbaijan, no change.	E
LSQINDEX	Least Squares Index Measures the disparity between the distribution of votes at the election and the allocation of seats in parliament. Examples: Spain, 5.30; Jamaica, 0.61; Cape Verde, 2.36. Source: Michael Gallagher and Paul Mitchell (eds). 2008. <i>The Politics of Electoral Systems</i> . Oxford University Press.	E
ENEP	Effective number of parties at the electoral level The measurement counts political parties and their relative strength in terms of vote shares. Examples: Spain, 5.03; Jamaica, 2.01; Cape Verde, ENEP: 2.24. Source: Markku Laakso and Rein Taagepera. 1979. "Effective" Number of Parties: A Measure with Application to West Europe" <i>Comparative Political Studies</i> April, 12: 3-27	E
ENPP	Effective number of parties at the parliamentary or legislative level The measurement counts parties and their relative strength in regards to parliamentary seat shares. Examples: Spain, 4.16; Jamaica, 2.00; Cape Verde, ENPP: 2.12. Source: Markku Laakso and Rein Taagepera. 1979. "Effective" Number of Parties: A Measure with Application to West Europe" <i>Comparative Political Studies</i> April, 12: 3-27	E

Appendix. Elections and Countries included in PEI-4.5

Country	Election Date	Election type
Mexico	July 1, 2012	Presidential
Congo, Republic of	August 5, 2012	Legislative
Angola	August 31, 2012	Legislative
Netherlands	September 12, 2012	Legislative
Belarus	September 23, 2012	Legislative
Georgia	October 1, 2012	Legislative
Venezuela	October 7, 2012	Presidential
Czech Republic	October 12-13, 2012	Legislative
Montenegro	October 14, 2012	Legislative
Lithuania	October 28, 2012	Legislative
Ukraine	October 28, 2012	Legislative
United States	November 6, 2012	Presidential
Sierra Leone	November 17, 2012	Presidential
Kuwait	December 1, 2012	Legislative
Burkina Faso	December 2, 2012	Legislative
Slovenia	December 2, 2012	Presidential
Ghana	December 7-8, 2012	Presidential
Romania	December 9, 2012	Legislative
Japan	December 16, 2012	Legislative
Korea Republic	December 19, 2012	Presidential
Israel	January 22, 2013	Legislative
Jordan	January 23, 2013	Legislative
Czech Republic	January 25, 2013	Presidential
Cuba	February 3, 2013	Legislative
Ecuador	February 17, 2013	Presidential
Armenia	February 18, 2013	Presidential
Grenada	February 19, 2013	Legislative
Barbados	February 21, 2013	Legislative
Djibouti	February 22, 2013	Legislative
Italy	February 24, 2013	Legislative
Cyprus	February 24, 2013	Presidential
Kenya	March 4, 2013	Presidential
Micronesia	March 5, 2013	Legislative
Malta	March 9, 2013	Legislative
Montenegro	April 7, 2013	Presidential
Venezuela	April 14, 2013	Presidential
Paraguay	April 21, 2013	Presidential

Iceland	April 27, 2013	Legislative
Malaysia	May 5, 2013	Legislative
Pakistan	May 11, 2013	Legislative
Bulgaria	May 12, 2013	Legislative
Philippines	May 13, 2013	Legislative
Equatorial Guinea	May 26, 2013	Legislative
Iran	June 14, 2013	Presidential
Albania	June 23, 2013	Legislative
Mongolia	June 26, 2013	Presidential
Bhutan	July 13, 2013	Legislative
Togo	July 25, 2013	Legislative
Japan	July 21, 2013	Legislative (Senate)
Kuwait	July 27, 2013	Legislative
Cambodia	July 28, 2013	Legislative
Zimbabwe	July 31, 2013	Presidential
Mali	August 11, 2013	Presidential
Australia	September 7, 2013	Legislative
Norway	September 9, 2013	Legislative
Rwanda	September 16, 2013	Legislative
Swaziland	September 20, 2013	Legislative
Germany	September 22, 2013	Legislative
Guinea	September 24, 2013	Legislative
Austria	September 29, 2013	Legislative
Cameroon	September 30, 2013	Legislative
Azerbaijan	October 9, 2013	Presidential
Czech Republic	October 25, 2013	Legislative
Georgia	October 27, 2013	Presidential
Argentina	October 27, 2013	Legislative
Tajikistan	November 6, 2013	Presidential
Maldives	November 16, 2013	Presidential
Nepal	November 19, 2013	Legislative
Honduras	November 24, 2013	Presidential
Chile	December 15, 2013	Presidential
Turkmenistan	December 15, 2013	Legislative
Madagascar	December 20, 2013	Presidential
Mauritania	December 21, 2013	Legislative
Bangladesh	January 5, 2014	Legislative
Thailand	February 2, 2014	Legislative
Colombia	March 9, 2014	Legislative
El Salvador	March 9, 2014	Presidential

Serbia	March 16, 2014	Legislative
Maldives	March 22, 2014	Legislative
Slovakia	March 29, 2014	Presidential
Hungary	April 6, 2014	Legislative
Costa Rica	April 6, 2014	Presidential

Mongolia	June 29, 2016	Legislative

¹ Elections in Libya, Senegal, and Timor-Leste were not included.

² In addition, in 2014 elections in Haiti, Lebanon, and Comoros were delayed or suspended. Those are thus not included in the dataset. The election in Thailand was held and later annulled. Results are included in the data release.

³ In previous releases of the data, we included two observations for the 2014 election in North Korea on March the 9th. Given the specific characteristics of the North Korean regime, we do not include it anymore.

⁴ One reason for excluding micro-states is the lack of sufficient election experts. From the list of all 193 UN member states, 12 are excluded as micro states, because they have a population of less than 100,000 people in 2013 and no sufficient pool of experts can be established for these. These micro states are: Andorra, Antigua and Barbuda, Dominica, Liechtenstein, Marshall Islands, Monaco, Nauru, Palau, Saint Kitts and Nevis, San Marino, Seychelles, and Tuvalu.

Five countries are excluded because their constitution does not provide for national-level elections. These are Brunei Darussalam, China, Qatar, UAE, and Saudi Arabia.

Three countries – Eritrea, Somalia and South Sudan – are currently excluded because even though they have constitutional provisions for national elections, none have been held since independence or within the last 30 years.
